### FIREBUGS ESCAPE IN STRIKE REGION

Williamson, W. Va., May 25.—M. C. Kindelberger, State Fire Marshal of West Virginia, said last night on his return from Matewan that he believed incendiaries were responsible for the fire which destroyed the head house of the Stone Mountain Coal Corporation at that village earlier in the day, entailing a loss estimated at \$25,000.

The Fire Marshal, accompanied by a squad of State troopers, went to Matewan to investigate the blaze at the direction of Maj. Tom B. Davis, who was named by Governor E. F. Morgan to take charge of the situation growing out of recent disorders along the West Virginia-Kentucky border.

Reporting to the major, Mr. Kindelberger said, "I believe that the fire was evidently the work of persons residing at Matewan."

The fire was the only untoward incident reported during the day from the zone which has been the scene of shooting during the past ten days.

When the Fire Marshal arrived at the scene, he told the major, the headhouse and large slack pile were burning and the tipples were threatened.

Kindelberger, the troopers and a number of deputies directed streams of water on the fire and succeeded in saving the tipples. The slack pile was fired when a burning mine car broke loose from the headhouse and started down an inclined plane toward the tipples. It was stopped at the pile before it reached the tipples.

The Marshal said that bloodhounds, taken to the scene in an effort to capture persons who might have been responsible, failed to pick up a trail.

The slack pile was burning last night, and Kindelberger ordered the Williamson fire department to send several lines of hose to Matewan.

Chief Deputy Sheriff John Hall made a tour of the trouble area along the Tug River as far east as Blackberry City, and reported "everything" quiet.

Capt. J. R. Brockus of the State police continued his efforts today to organize the "law and order" forces of

### citizens deputized as officers for any emergency. The Captain said that seventy-five of the volunteers had been armed with rifles, bringing the total of the citizen guard to 250.

### WHEAT CROP TO BE LARGER.

Kentucky's wheat crop this year will be 2,241,000 bushels more than last year. It is estimated that the state will produce 7,451,000 bushels in 1921. The Commissioner of Agriculture's report indicates 150,000 more tons of hay this year than last year, when the state produced 1,508,000 tons of hay. There remains on the farms in this state 157,000 tons of hay of last year's crop.

## Some FACTS About

**Ford**  
 THE UNIVERSAL CAR

Here are authentic figures from the Ford factory at Detroit. They show you just how many Ford cars and trucks have been built each month since January 1, 1921, and how many have been sold to retail customers, in the United States.

	Produced	Retail Customers Delivered to
JANUARY	29,883	57,208
FEBRUARY	35,305	63,603
MARCH	61,886	87,221
Total Production	127,074	Total Retail Sales 208,032

showing that actual sales for the first three months of 1921 exceeded production by 80,958 Ford cars and trucks!

April requisitions already specify 107,719 additional cars and trucks and the estimated April output of the factory and assembly plants combined calls for only 90,000!

These facts clearly show that the demand for Ford products is growing much faster than manufacturing facilities to produce and were it not for the dealers' limited stocks, which are now being rapidly depleted, many more customers would have been compelled to wait for their cars. It will be only a matter of weeks, therefore, until a big surplus of orders will prevent anything like prompt deliveries.

If you would be sure of having your Ford car or truck when you want it, you should place your order now. Don't delay. Phone us or drop us a card.
